Rail Web Width Measuring Device

High Measuring Accuracy

LCD Digital Display

Metric/Imperial Unit

Customizable Positioning Block

• **Introduction:**

Rail Web Width Measuring Device is a kind of measuring instrument for measuring the rail web width.

• **This item has the following features:**

1. Using NdFeB strong magnet positioning, accurate positioning, high repeatability of measurement;
2. LCD digital display, easy to reading, with accurate and reliable measurement;
3. The positioning block can be customized according to the rail type.
4. Different rail types can be measured by changing the positioning block.

LCD Digital display, Switch between metric and imperial unit at will ,that help easy to read.

Metric unit

Imperial unit

The positioning block can be customized according to the different rail types.

Package

Main Technical parameter :

Model	Measure range (mm)	Accuracy (mm)	Repeatability of indication value (mm)
LJ-GK-A	0—120	0.01	0.05
