

LIANJIE

TGC-W-II

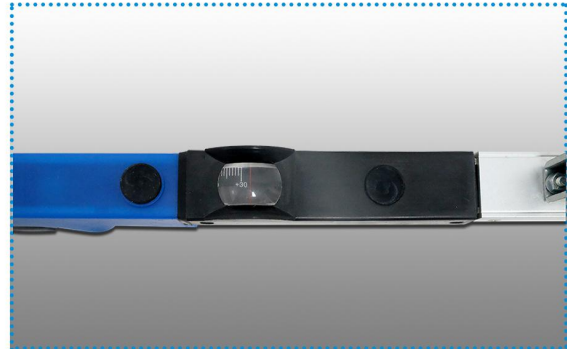

Analogue Track gauge

- Affordable price
- Simple operate
- Easy calibrate

• Introduction:

Analogue Track gauge is used for measuring the railway track gauge ,check rail gauge,back to back distance , superelevation . Suitable for railway speed not greater than 160km/h .Traditional compass is more easier for rail workers to accept and operate. Light weight structure is convenient to carry.

Main Technical parameter :

Model	TGC-W-II 1000	TGC-W-II 1067	TGC-W-II 1435	TGC-W-II 1520	TGC-W-II 1676
Track gauge	975-1030	1042-1102	1410-1470	1493-1560	1650-1712
Check rail gauge	950-970	1013-1033	1381-1401	1466-1486	1622-1642
Back to back distance	907-927	970-990	1338-1358	1423-1443	1579-1599
Super-elevation range	-150~+150	-150~+150	-150~150	-160 ~ 160	-150~150
Super-elevation resolution	1	1	1	1	1
Track gauge resolution	1	1	1	1	1
